Clinical Business Intelligence (CBI) Internship

An Exciting Career Opportunity
Intelligent Medical Systems (Pty) Ltd is offering a 12 month, paid internship, to 5 students from southern suburbs schools. The intent is to give school leavers interested in medicine and / or information technology, the opportunity to explore that interest and learn about hospital safety, while earning a modest salary. We believe this “Gap Year” will enable them make the best long term career choice before embarking on an expensive university degree.

The internship programme will also add to the CV of those that wish to study medicine, but have not yet been accepted into the University of their choice. The best interns will be considered for long term employment by Intelligent Medical Systems.

Applicants are expected to have outstanding Mathematics marks and outstanding results in either Science or Biology, or both.

Intelligent Medical Systems is a leading, clinical decision support company, supplying clinical systems to more than 100 ICUs and more than 50 leading hospitals - see www.intelms.com
Clinical Intelligence

Rapid Identification of “at-risk” patients and Expert Guidance

#SafeHospitals
